## Education

**Bachelor of Arts (Majors in Psychology) | IGNOU**

2018 – 2022

**BS Degree in Data Science and Applications | IIT Madras**

2026 – pursuing

## Certifications

 Mathematics for Machine Learning by Imperial College London (Coursera)

 Microsoft Power BI Data Analyst Certificate by Microsoft

 Machine Learning Specialization by DeepLearning.AI (Andrew Ng)

 Google IT Support Professional Certificate by Google (Coursera)

 Atlassian IT Service Management (ITSM) Professional Certificate

 Atlassian Agile Project Management Professional Certificate

 ServiceNow IT Leadership Professional Certificate

## Tools

MS Office and Google Workspace  
Zendesk, Salesforce and Jira  
SQL & Python  
Amadeus

## Objective

Business Analyst with a Data Science background and 3+ years of enterprise experience translating business needs into analytics solutions. Skilled in SQL, Power BI, Python, and Azure. Passionate about leveraging AI and intelligent automation to solve complex business challenges. Strong communicator with executive presence and cross-functional leadership capabilities.

## Experience

NOVEMBER 2022 – MAY 2024

**Senior Technical Analyst | Inergizer IT Services Private Limited**

-  Managed and resolved Level 2 B2B technical support tickets, consistently meeting internal SLAs and ensuring high customer satisfaction.
-  Troubleshot application workflows and production incidents by analyzing system logs and executing SQL database queries to identify data discrepancies
-  Conducted Root Cause Analysis (RCA) on recurring software defects, collaborating with cross-functional engineering teams to deploy sustainable fixes.
-  Utilized Looker to analyze production incident logs and SQL query outputs, creating shared data views that helped engineering teams visualize recurring defects and prioritize root cause analysis (RCA) efforts.

JUNE 2024 – June 2026

**Service Advisor | Call BA – Subsidiary of British Airways**

Provided L2 technical and functional support for ticketing, reissues, and fare rule validation using Amadeus GDS.

-  Provided technical and functional support for complex enterprise software (Amadeus GDS), troubleshooting system processing issues and software configuration errors.
-  Ensured strict compliance with data privacy and security frameworks while handling sensitive customer PNR data and financial workflows.
-  Triaged issues into appropriate categories, escalating critical API and system integration bugs to internal development teams.
-  Developed and maintained Power BI dashboards to visualize ticketing reissue trends, fare rule validation failures, and customer PNR data anomalies, enabling proactive identification of recurring system issues and reducing average handling time.

**Data Scientist Intern | Tera Global Enterprises**

- 📊 Analyzed and processed structured and unstructured data to extract actionable insights.
- 📊 Built and maintained data pipelines for data collection, preprocessing, and transformation.
- 📊 Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to improve data quality.
- 📊 Collaborated with cross-functional teams to support data-driven decision-making and model development.
