VP Operations — Weekly Performance Brief

Prepared for: VP Operations & Leadership | Prepared by: Analytics | Period: 10 – 16 August 2026

EXECUTION 78.93% ↑ 3.22 pp WoW 221 completed · 59 missing	BACKLOG 10 open ↑ 2 WoW 7 overdue · 5 escalated	COMPLIANCE 81.67% ↓ 1.05 pp WoW 1.67 pp above target
---	---	--

Executive Summary

Performance: Execution improved week over week from 75.71% to 78.93% (+3.22 percentage points), but remains below the 80% target. Compliance remains above the 80% target at 81.67%, although it declined 1.05 percentage points from the previous week.

Risk: Ticket pressure remains elevated despite fewer overdue tickets. Open tickets increased from 8 to 10, while overdue tickets declined from 8 to 7.

Action: The immediate priority is preventing newly opened work from entering the overdue queue, and focusing intervention on the four outlets below 61% compliance.

1. Network KPI Performance

Table 1. Network KPI Performance — 10–16 August 2026

Note: Week-over-week changes are calculated from the prior reporting period; baseline week shown as starting point.

METRIC	VALUE	LEADERSHIP INTERPRETATION
Completed submissions	221	Scheduled execution completed during the week.
Completion rate	78.93%	Below 80% operating target — follow up on missing work.
Missing scheduled submissions	59	Execution gap; drill into by outlet on the live dashboard.
Compliance rate	81.67%	Above 80% target overall, but uneven across outlets.
Total tickets (week)	33	New tickets raised in the reporting week.
Open tickets	10	Current unresolved workload.
Overdue tickets	7	70% of open tickets are past expected resolution.
Escalated tickets	5	Half of open workload is escalated.
High-priority open tickets	2	Immediate-risk queue requiring named ownership.

2. Outlets Requiring Attention

Table 2. Outlet Intervention Queue
Ranked by average compliance across daily checklists and hygiene audits.

#	OUTLET	COMPLIANCE	TARGET	GAP	RECOMMENDED ACTION
1	Nagpur – Civil Lines	47.92%	80%	-32.08 pp	Immediate CAP req.
2	Ahmedabad – SG Highway	48.37%	80%	-31.63 pp	Immediate CAP req.
3	Delhi – Connaught Place	59.06%	80%	-20.94 pp	Root-cause review
4	Nashik – College Road	60.71%	80%	-19.29 pp	Recovery plan
5	Jaipur – MI Road	73.61%	80%	-6.39 pp	Targeted coaching

Accountable managers can be identified through the live dashboard's ticket-level drill-down. CAP = Corrective Action Plan.

3. Ticket Backlog & Issue Mix

The current queue reports **33 total tickets** for the week, with **10 open**, **7 overdue**, **5 escalated** and **2 high-priority open**. The escalation table on the live dashboard is sorted oldest-first and surfaces seven-day-old overdue tickets at the top of the queue.

By category, Equipment represented 9 of 33 new tickets (**27.3%**), making it the largest category. However, category volume alone does not establish operational causality; ticket severity and resolution time should be monitored alongside volume.

Figure 1. Weekly Ticket Mix by Category
Figures describe the new-ticket mix for the week, not the open backlog by category. This is the baseline reporting week; week-over-week change will be reported from next brief onward.

4. Recommended Leadership Actions

- ✓ **Prioritise high-severity tickets.** Review the 2 high-priority open tickets first and confirm active, named ownership.
- ✓ **Reduce overdue backlog.** Review the 7 overdue open tickets, assign a named owner and target resolution date, and escalate exceptions by Wednesday.
- ✓ **Investigate equipment.** Use the 9 Equipment tickets as a starting point for root-cause analysis — without asserting causation from category volume alone.
- ✓ **Monitor execution.** Follow up on the 59 missing scheduled submissions and watch whether completion returns above the 80% operating target next week.
- ✓ **Assign recovery plans.** Direct Area Managers for the four outlets below 61% compliance to submit immediate corrective-action plans (CAP), with the fifth-lowest outlet monitored as a recovery case.

Measurement notes

Completion rate: calculated against scheduled submissions for recurring forms only.
Compliance: based on applicable checklist/audit submissions against the 80% target.
Ad-hoc forms: Kitchen Equipment Audit and Store Issue Report excluded from scheduled completion metrics.
Ticket backlog: open tickets as of the reporting-period end.
